

# MC78XX/LM78XX/MC78XXA

## 3-Terminal 1A Positive Voltage Regulator

### Features

- Output Current up to 1A
- Output Voltages of 5, 6, 8, 9, 10, 12, 15, 18, 24V
- Thermal Overload Protection
- Short Circuit Protection
- Output Transistor Safe Operating Area Protection

### Description

The MC78XX/LM78XX/MC78XXA series of three terminal positive regulators are available in the TO-220/D-PAK package and with several fixed output voltages, making them useful in a wide range of applications. Each type employs internal current limiting, thermal shut down and safe operating area protection, making it essentially indestructible. If adequate heat sinking is provided, they can deliver over 1A output current. Although designed primarily as fixed voltage regulators, these devices can be used with external components to obtain adjustable voltages and currents.

### Internal Block Diagram

## Absolute Maximum Ratings

| Parameter                                  | Symbol          | Value           | Unit          |
|--------------------------------------------|-----------------|-----------------|---------------|
| Input Voltage (for $V_O = 5V$ to $18V$ )   | $V_I$           | 35              | V             |
| (for $V_O = 24V$ )                         | $V_I$           | 40              | V             |
| Thermal Resistance Junction-Cases (TO-220) | $R_{\theta JC}$ | 5               | $^{\circ}C/W$ |
| Thermal Resistance Junction-Air (TO-220)   | $R_{\theta JA}$ | 65              | $^{\circ}C/W$ |
| Operating Temperature Range                | $T_{OPR}$       | $0 \sim +125$   | $^{\circ}C$   |
| Storage Temperature Range                  | $T_{STG}$       | $-65 \sim +150$ | $^{\circ}C$   |

## Electrical Characteristics (MC7805/LM7805)

Figure 9. Constant Current Regulator

**Notes:**

- (1) To specify an output voltage, substitute voltage value for "XX." A common ground is required between the input and the Output voltage. The input voltage must remain typically 2.0V above the output voltage even during the low point on the input ripple voltage.
- (2) C1 is required if regulator is located an appreciable distance from power Supply filter.
- (3) Co improves stability and transient response.

#### **DISCLAIMER**

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS.

#### **LIFE SUPPORT POLICY**

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION. As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, and (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in a significant injury of the user.
2. A critical component in any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.
